

The HISTORY of IKOSOLID SCIENCE

IKOSOLID SCIENCE makes to contribute to the evolution of the earth and the human race and the improvement with the fusing of art and science as the goal.

2001 (May)

IKOSOLID (the art name: REAL CUBE) was born with husband and wife

of Koei Endo and Ikuyo Endo on May 22, 2001. / The fusing paper of art and science "Study of connecting point with three-dimensions and four-dimensions by pictorial art" It began the description of IKOSOLID SCIENCE from the viewpoint of the topological and the crystallography.

2002

It was a domestic display multitude as modern art object REAL CUBE.

(December) The electron experiment beginning of IKOSOLID SCIENCE

2003

(February) "Former integrated science technical conference member of

Parliament (the chairperson Prime Minister Koizumi)who is the vice-president and CEO of Hitachi, Ltd." When sending an experiment video to the CEO, there was a phone of the answer at once from him; It accepted a verification offer of 3 weeks. But the central institute ignored and answered with ordinary wire wiring about IKOSOLID.

(June) "The president of SHARP" The reply to have received verification in the ferry central institute in the direct experimental work material to the SHARP (the president) but to be unclear, applying / "Hitachi, Ltd. the vice-president and CEO" It demanded the verification of once again from Hitachi, Ltd. but the CEO gave us that it was unclear with the handwritten answer, applying. / "Furukawa Electric Works (The development person in charge)" It refused by being acatalepsia.

(October) It asked IKOSOLID SCIENCE as the quantum computer server.

"Sony (the vice president)" He answered " I thought from all the surfaces but it wasn't possible to understand. I expect that the person who can understand emerges" / "Hitachi, Ltd. (Fundamental Research Laboratories director)" He answered "It wasn't possible to become useful sorry" / "IBM Japan (The president)" He answered "There were not an individual for the company to understand and an organization that can understand". / "Fujitsu (The computer institute director)" It is not, answering./ "NEC (The quantum computer institute director and the head researcher)" It is not, answering / "NTT (The physical properties science fellow)" It is not, answering . . . Then, as for IKOSOLID SCIENCE, to

verify in the classification, all was returned after verification regardless of the existence or non-existence of the reply.

Art : REAL CUBE installs in Villa Poniatowski Museum in national Villa Julia Museum Italian Rome in April. It received the coverage and the filming of Vatican national TV for 1 hour; not being in the appointment in the Roman place.

2004 (January) **“IBM (the American head office) CEO”** When mailing an experimental work material, not being been in the direct connection in at IBM (the American head office) CEO, the 3 month verification could be immediately demanded. Because the mailing material was a classification, it electrolyzed completely and it began in the verification by the consent form creating. It exchanged a consent form for IBM Japan, too, by the head office order. The result became blank in the opinion not to want to be tied up now from the physical information group researcher. The verification was “the quantum computer development technology ”.

(July) **“British Nature”** It delivered a scientific article to British nature in email. The answer of the communication refusal came from nature chief editor. / **“The Prime Minister Junichiro Koizumi”** At the Prime Minister Junichiro Koizumi , it presented the protection wish architectural white paper of IKOSOLID SCIENCE . / **The IKOSOLID commercialization success / “500 domestic major University professors (Electron and the physics)”** It sends 500 domestic major University professors (electronic and physical) IKOSOLID product brochure and a manual and it is not from one, too, answering. / **“500 main electronics industry company presidents”** It delivered to 500 main electronics industry company presidents in the same way but there was an answer only from one major company chairman. He answered “It is wonderful if this is a fact “
At the time of 2004, the principle of the IKOSOLID electron experiment was unclear. It didn't find that the principle was the occurrence of the positron without the pair annihilation of positron and electron.

(October) In Chiba Prefecture Makuhari, **it made a presentation as the IKOSOLID CONDUCTOR and it did an open experiment at CEATEC JAPAN 2004.** (The leakage-flux decrease experiment. The resistance decrease experiment. The overheating temperature decline experiment = generally, the electric appliance becomes hot, but during using IKOSOLID as a conductor , it's not becoming hot. The experiment of the

power factor improvement and making PF1. The living long battery experiment. The PC speed up experiment) By the introduction of Shintaro Ishihara of Tokyo Governor, in the exhibition hall, it received verification to the Koizumi cabinet integrated science technical conference cabinet shade scientist who was the chief director in the independent administrative agency certain plasma institute and had three doctorates (physics doctor, DE, MD). It was authenticated when the electron which has a positive electric charge in the line and the electron which has a negative electric charge stood in line and were flowing to the same direction. (Later, authentication of the occurrence of the positron without the pair annihilation of positron and electron in the line. In the present-day science, it is senseless that the positron without the pair annihilation of positron and electron occurs. However, the positron exists in the condition of the 90 degree phase to electron. Then, the positron is in the electronic reverse and the face of the positron exists for the back. IKOSOLID is the conductor which has the topological transformation feature of 90 degrees and the ability to go to the face in the face of the positron.)

~ 2009 After that, for about 5 years, the shadow scientist did the receiver (the verification) of IKOSOLID SCIENCE. As the result, it succeeded in these things and it was possible to come to practical use. The normal temperature alternating current super-conductivity, the normal temperature alternating current super-fluidity, the occurrence of the positron that particle and the antiparticle don't make the pair annihilation of particle and the antiparticle in the line and the spatial radiation. However, lastly we separated with the shadow scientist and separated into another road. By the tracing with the shadow scientist with eminent super level of the world, we succeeded in “unification of electromagnetic willpower and gravity of four-power of the space”. Therefore it realized the scientific revolution which uses the positron and the electron which don't make the pair annihilation of positron and electron and the meteorology revolution which can do the occurrence prevention of the global natural disaster beforehand and the relaxation of it.

To prevent from the Tokyo vertical thrust big earthquake of the occurrence estimate in May, 2005 beforehand continues at present, too. Then, there was estimate which occurs every 8 months in the Tokyo

vertical thrust big earthquake with magnitude equal to or more than 8. However, it never occurs. Pay attention to the weather change which was not before. The extraordinary change of the passage of the typhoon. The decrease of the earthquake. The big gap of the weather expectation and the result. As of 2010, the place of the establishment of Japan of REAL CUBE : Fukushima, Saitama, Tokyo, Chiba, Aichi, Oosaka, Uonuma (Niigata) , Fukui, Kurume (Fukuoka) . It supports a natural disaster occurrence prevention and relaxation to the earthquake, the typhoon. Specifically, to defend a nuclear power plant against the earthquake is important.

It is IKOSOLID SCIENCE that can do occurrence prevention beforehand and relaxation in the natural disaster of the earth level. This is senseless in the present-day meteorology. However, by IKOSOLID's radiating an X ray, electron, neutron and so on as crystallization and impressing them, it diffracts the 90 degree topological transformation which depends on the multiple two dimensions body. By that is, that give frequency vibration from outside, it supports an oscillation origin natural frequency and by doing a 90 degree topological transformation, acceleration effect of the velocity of light (= the normal temperature alternating current super-conductivity) and attenuation effect of the extension of the light wave length (= the normal temperature alternating current super-fluidity) are occurred.

These principles are in following PDF. It sends research PDF, containing and dividing this email into five times.

When establishing the REAL CUBE to the world, it is doing IKOSOLID SCIENCE open experiment and a lecture. Mainly in the REAL CUBE installation place, the occurrence prevention of the earth level natural disaster beforehand and the relaxation of it are seen. By the self correction (the spontaneous recoveries) of the natural disaster of the earth level by the earth, as for the earthquake, it finds a positron from the ionosphere with the electron-emission from in the ground to the ionosphere. The typhoon radiates electron from the ionosphere to the surface of the earth and the surface of the sea, and it finds a positron from in the ground and in the sea.

When the natural frequency of the earthquake and the typhoon to IKOSOLID (the art name REAL CUBE) is conveyed, the positron occurs by the 90 degree topological transformation of multiple two dimensions body of IKOSOLID and the occurrence prevention of the natural disaster beforehand and the relaxation of it are done by it. For Japan has to prevent from the occurrence of the Tokyo vertical thrust big earthquake beforehand by the top priority, IKOSOLIDS (the art name REAL CUBE)are installed in Tokyo and around it. It makes a foundation to achieve this purpose “REAL CUBE installation in all over the world for the prevention of natural disaster occurrence of the self correction by the earth beforehand”. Because it is possible to do the occurrence prevention of the earth level natural disaster beforehand, it succeeded in “unification of electromagnetic willpower and gravity of four-power of the space”. The utilization of the positron and the electron without the pair annihilation of positron and electron can bring about a scientific revolution and a meteorology revolution. In the scientific revolution, it makes the break-through of all scientific researches occur and it improves bringing global economy in New Industrial Revolution. There is not world popularization of IKOSOLID SCIENCE unless it is the science that can show the ability actually. As the meteorology revolution, the natural disaster by the earth self

correction such as the urgent global warming is able to be prevented before anything happens.

2010~2011 With the fusing of art and science, to contribute to the evolution and the improvement of the earth and the human race is the purpose of IKOSOLID SCIENCE. Therefore, at present, it is appealing for the world by IKOSOLID SCIENCE by the fusing of the art and the science for New Industrial Revolution by the scientific revolution and the meteorology revolution to occur to all over the world.

We seek and need the comprehender and the cooperater of IKOSOLID SCIENCE ! !
